SUMMARY

Aspiring IT professional with foundational skills in networking and web development. Experienced in designing basic network topologies using Cisco Packet Tracer and building web systems using modern development tools and technologies. Possesses strong communication skills, adaptability, time management abilities, and teamwork skills. Eager to gain hands-on experience and grow in a professional IT environment.

PROJECTS

PLV-AlumNet | Capstone Project

2026 - Present

- Served as Documentation Lead, responsible for preparing and organizing the project manuscript and research materials in compliance with institutional guidance.
- Integrated frontend and backend components by connecting Laravel-based server-side logic to UI views built with Blade, Tailwind CSS, and JavaScript, ensuring consistent data flow across the system.
- Collaborated with a team of four in designing and building a centralized web-based platform that connects PLV alumni with verified job opportunities, employer postings, and institutional announcements.

Mataya-taya | Game Development

August - December 2025

- Tested tabletop, hybrid, and spin-off versions of the game to identify gameplay issues, balancing concerns, and user experience improvement before the actual deployment.
- Documented gameplay inconsistencies and player feedback, helping the development team improve game mechanics and overall playability.
- Collaborated with the development team during testing sessions to ensure smoother gameplay flow and maintain the core mechanics inspired by the traditional Filipino game Mataya-taya.

Travis Sweets and Baked Goodies | Web Development

February - May 2025

- Engineered the backend of a bakery web system using PHP and MySQL, enabling customers to browse products and place orders through a functional and accessible online platform.
- Developed a complete ordering feature that handles customer product selection and order submission, streamlining the order process through structured database management.
- Assisted in frontend implementation while taking primary ownership of backend logic, contributing to a consistent and seamless user experience across the system.
- Deployed and published the website using a live paid domain, making the platform publicly accessible to real users.

PLV COED Building Network Infrastrucure (Simulation) | Networking | Cisco Packet Tracer

September - December 2024

- Designed and simulated a network infrastructure for a 6-floor PLV university building using Cisco Packet Tracer, creating a stable and scalable campus network setup for academic use.
- Configured and implemented routing protocols such as static routing, EIGRP, and RIP, improving network connectivity, routing efficiency, and communication between floors.
- Collaborated with a 4-member team to plan floor network layouts, optimize device placement, and ensure full network coverage throughout the entire building.

EDUCATION

Bachelor of Science in Information Technology

Pamantasan ng Lungsod ng Valenzuela

Valenzuela City, Metro Manila

2023 - Present

Science, Technology, Engineering and Mathematics (STEM)

Punturin Senior High School

Valenzuela City, Metro Manila

2021 - 2023

CERTIFICATES

- CCNA Networking Basics - April 10, 2025
- CCNA Network Devices and Initial Configuration - April 17, 2025
- CCNA Network Addressing and Basic Troubleshooting - May 04, 2025
- CCNA Network Support and Security - May 08, 2025

SEMINARS

- “VITSploration: An Exploration of Different IT Industries” - December 2023
- “Securing Connections: Strategies for Cybersecurity and Network Operations” - April 2024
- “Beyond Awareness: Enhancing Cyber Resilience with ESET” - April 2025

SKILLS & INTERESTS

Frontend Development: HTML, Tailwind CSS, CSS, JavaScript

Backend Development: PHP, Laravel, MySQL

Networking: Cisco Packet Tracer, Basic Topology Design, Routing Protocols

Personal Skills: Communication, Public Speaking, Team Collaboration, Adaptability, Time Management, Active Listener
